Collaborating with the Jewish Genealogy SIG (Special Interest Group) of Naples/Lee Co FL headed by Mr. Arthur Sissman

April Meeting, Tues 4/13/21 10 am - 11:30 am

The April meeting will feature this topic:

Multi-Website Searches - Streamlining Your Research - Tips & Tricks

The general idea of this topic is to have the ability to search multiple genealogy websites using the same data starting from one site.

Example: I am looking for my grandfather, John Sissman.

- I want to find his death certificate.
- I know somethings about him but am not sure where to focus my searches.
- I usually will go from one website - Ancestry, Family Search, MyHeritage, Google, etc. - to another and start all over each time.

- What if there was a place where I could put in my appropriate known data and search all the above and more at one time?

That is what this interactive presentation is all about.

The attendees will receive a pdf file & Zoom link before the meeting.

The pdf will allow you to get set up for the meeting -

- Download a Chrome extension to use.
- Find the Genealogy Dashboard for use.
- Discover the wonders of SteveMorse.
- Several articles and videos on how to set up your device(s) in Windows 10 and MacOS and various tablets to use Split Screen or 2 monitors.
- Prep or do not prep!
